EDUCATION

The Assam Kaziranga University

Bachelor of Technology in Computer Science Engineering

- CGPA: 8.5/10

Trinity Junior Science College

12th SEBA

- CGPA:7.5/10

Jatiya Vidyalaya Sipajhar

12th SEBA

- CGPA :9.8/10

SKILLS

Technical Skills:

- **Containerization & Orchestration:** Docker, Kubernetes
- **Cloud & DevOps Tools:** AWS, Terraform, Ansible
- **Scripting & Automation**: Bash, Linux Shell
- **Version Control & Collaboration:** Git, GitHub

Programming: Java

CERTIFICATIONS

- **Learn by Doing – Prompt Engineering** *(link)*
- **Deloitte Australia - Data Analytics Job Simulation** *(link)*

VOLUNTEERING

National Service Scheme(NSS)

NSS Volunteer

Volunteered in local villages, contributing to community service and awareness programs

PROJECTS

1. Containerized MERN Stack Application | Docker, Docker Compose

- **Orchestrated Multi-Container Deployment:** Used **Docker Compose** to manage a 3-tier MERN stack (React, Node.js, MongoDB), allowing the entire application to start with a single command.
- **Implemented Data Persistence & Networking:** Configured **Docker Volumes** to prevent database data loss and created a **Bridge Network** to enable secure communication between services using container names.
- **Optimized Image Builds:** Authored efficient **Dockerfiles** using official Node.js images and **layer caching**, significantly reducing build times and image sizes for faster deployments.

2. AWS Resource Monitoring and Alerting System

- Developed an **AWS Resource Tracker** using Bash scripting and AWS CLI to monitor EC2 instances, S3 buckets, Lambda functions, and IAM users.
- Automated system reporting using **cron jobs** and **implemented email notifications** via SMTP for real-time monitoring.
